Hurricane Harvey Incident - Report 7

Reporting Period: 8/24/17 – 8/31/17 - 1530

Current Situation (8/31/17)

- Explosion in Crosby, TX released organic peroxides. 18-20 people report being exposed and having symptoms of headache, shortness of breath and difficult or labored breathing – treated in a health care facility and have been released home. TPCN is available to answer questions concerning exposures, water and/or air contamination.
 - TPCN Specialists are not able to send patients to hospitals in the **Beaumont, TX** area due to the city having no water supply and doesn't estimate they will have water for 5 days or more.
 - SETPCC (Galveston) – Building inspector has approved occupancy and UTMB (Hospital) has approved operations to start at 0700 CST
-
- All Specialists in Poison Information of the Texas Poison Center Network have been instructed to continue to collect additional information on hurricane related exposures and to code cases as PUB Health EMERG and to use AAPCC emergency code on the case to help aid in epidemiological studies.

See previous situation reports for historical updates.

All other regional poison centers in Texas will remain open and will handle all calls routed to them to cover the center(s) that have to close

Central Texas Poison Center will continue to provide situation reports daily until further notice, on behalf of TPCN.

You can find more disaster recovery advice at TexasPrepares.org.

Residents with poison concerns may continue to access 24-hour bilingual medical advice by calling the **National Poison Center hotline at 1-800-222-1222**.
